

Study Information for “SCREDDIT”

SCREDDIT

Every day for a week, you will get a few tasks. To complete these tasks, you either have to take a picture (sometimes with time stamp) or give a text-based answer.

You have one day to complete the tasks and if the due date is expired, then the task disappears. After each task you have to complete a questionnaire about your task experience. Please do complete those questionnaires.

After the experiment you will be rewarded with a chocolate bar in return for participating!

The web-app

The web-app is available on your phone/computer/tablet browser! It may be easier to use your phone to take pictures for the tasks, but you can choose whichever device you like.

You can sign up with your own username and password. After that you will be directed to a small questionnaire, after which you will be redirected to your personal SCREDDIT page. On this page you will find the tasks and questionnaires you have to fill in. On the navigation bar you can see “Study information”, which contains all the information that is in this document, so you can reread it.

Technical problems/questions

If you experience any technical problems or questions on how to use the system, please contact me (see contact details of the researcher). However, if your picture is not accepted, when you think it should have been, please try to send it in again (different background, position, lightening, etc.). If it does not get accepted, then this is a limitation of the system, as it won't be possible to intervene and thus help you out with this. For the text-based questions, you can expect them to be carefully checked and any fault will be due to some mistake you made.

After experiment

After the experiment I will conduct small a LimeSurvey with questions about how you experienced the whole experiment.

Purpose of the research

The purpose of this research is getting insight in how willing people are to perform tasks in an app with pre-made tasks. For the exact details about this, you can get an explanation after the experiment ended for all participants (but you have to email me about this!).

Benefits and risks of participating

All my research and research methods have negligible to minimal risks. I hope that the results will contribute to scientific knowledge about human behaviour interacting with SCREDDIT. In case you want to withdraw from the experiment, contact the experimenter and your personal identifiable data will immediately be deleted.

Use and preservation of your data

The answers on the tasks and the answers on the questionnaires, which are linked to your profile (name, age, email), will be stored in the database. The answers from the LimeSurvey will be stored on the Radboud servers for at most 1 year.

Your research data is stored and archived on my Raspberry PI web server for at most 1 year after the experiment. When this experiment is finalized and a report or article is written on this, the concomitant experimental data are shared or made public, enabling verification, re-use and/or replication of these research results.

Contact details of the researcher

In case of questions or complaints about an experiment, contact the responsible experimenter (sharonaniesert@live.nl).

Consent Form for *SCREDDIT*

By ticking on the box

I confirm that:

- I was satisfactorily informed about the study in writing, by means of the study information.
- I have carefully considered participation in the experiment
- I have read the provided information and I agree to the use of my data for the research purposes as described in the provided information
- I am 18 years or older.
- I participate voluntarily.

I agree that:

- I voluntarily share the following data: pictures, text-based answers, time stamps, answers on the build-in questionnaires, age, e-mail address, SCREDDIT password and LimeSurvey answers.
- My research data will be acquired and stored for scientific purposes for at most 1 years after the research has been finalized.
- I agree that research data gathered for this study may be published or made available provided my name or other identifying information is not used.
- By giving consent, I also give consent for the final LimeSurvey questionnaire
- My information can be quoted in research outputs.

I understand that:

- I have the right to withdraw from the experiment without having to give a reason.
- Information I provide will be used strictly only for educational purposes, namely a Bachelor thesis and (the) relative presentation(s).
- The data - without any personal information that could identify me - may be shared with others.
- My consent will be sought every time I participate in a new experiment.

☐ I give consent

Time stamp
dd-mm-yyyy
